

Description

The *AWS Certified Big Data – Specialty* exam validates technical skills and experience in designing and implementing AWS services to derive value from data. Attendees with any AWS associate level certification and two or more years of experience performing complex Big Data analyses should join this full-day, advanced-level course to learn how to prepare and succeed in the exam. We will start the day by covering the structure of the exam, including question formats. The majority of the time will be spent taking a deep dive into several data-driven use cases. Attendees will also receive a voucher to take an additional online practice exam at no cost.

Learning Objectives

This course teaches you how to:

- Understand the AWS Certification process and what to expect from the *AWS Big Data – Specialty* exam
- Understand the content domains that will be tested in the *AWS Certified Big Data – Specialty* exam
- Implement core AWS Big Data services according to architectural best practices
- Leverage tools to automate data analysis on AWS

Intended Audience

This course is intended for:

- Data architects
- Developers
- Solution architects

Prerequisites

We recommend that attendees of this course have the following:

- Two or more years of hands-on experience performing complex Big Data analyses on AWS
- Hold a current AWS Certified associate level certification

Delivery Method

This course is delivered through a mix of:

- Instructor-Led Training (ILT)
- Group discussion
- Sample exercise questions

Duration

Full day

Outline

This course covers the following concepts:

- Testing Center Information and Expectations
- Exam Overview and Structure
- Content Domains and Question Breakdown
- Topics and Concepts with Content Domains
- Question Structure and Interpretation Techniques
- Practice Exam Questions
