

Description

The *AWS Certified SysOps Administrator – Associate* exam validates technical expertise in deployment, management, security, and operations on the AWS platform. Join this half-day, intermediate-level course to learn how to prepare for the exam by exploring the exam’s topic areas and how they map to SysOps on AWS and to specific areas to study. The course reviews sample exam questions in each topic area and teaches you how to interpret the concepts being tested so that you can more easily eliminate incorrect responses. Attendees will also receive a voucher to take an additional online practice exam at no cost.

Learning Objectives

This course teaches you how to:

- Navigate the logistics of the examination process
- Understand the exam structure and question types
- Identify how questions relate to AWS SysOps concepts
- Interpret the concepts being tested by an exam question
- Allocate your time studying for the *AWS Certified SysOps Administrator – Associate* exam

Intended Audience

This course is intended for:

- Systems administrators
- Systems operators

Prerequisites

We recommend that attendees of this course have the following:

- At least one year of hands-on experience provisioning, operating, and maintaining systems running on AWS
- Course taken: [System Operations on AWS](#) (or equivalent knowledge)

Delivery Method

This course is delivered through a mix of:

- Instructor-Led Training (ILT)
- Sample exercise questions

Duration

Half day

Outline

This course covers the following concepts:

- Testing Center Information and Expectations
- Exam Overview and Structure
- Content Domains and Question Breakdown
- Topics and Concepts Within Content Domains
- Question Structure and Interpretation Techniques
- Practice Exam Questions
